

BOWED ELECTRONS 2022

FESTIVAL AND SYMPOSIUM

Collaborative composition workshop with Passepartout Duo

Passepartout Duo (<https://passepartoutduo.com/about-us>) invites musicians, sound artists, composers and anyone interested in working with sound, to participate in a **workshop**. The workshop is scheduled to take place during September 2022 as part of Bowed Electrons, a festival and symposium hosted by the South African College of Music of the University of Cape Town.

Each participant is asked to bring along an **object** to explore from a sonic perspective. These objects may or may not be thought of as sounding traditionally musical. A collective composition will subsequently be developed through group activities and under the guidance of the two guest musicians, who will also be sharing their experiences of creating music as a duo.

The intention is for participants to work together to explore the creative potential of the musical objects through the use of electronics and various compositional techniques. And the collective composition will be publicly presented in the form of a **performance**.

Please find a Call for Participants here: <https://passepartoutduo.com/be-2022>
